

Early Grade Success

STRATEGY

The Foundation's work in Early Grade Success reflects a focus on building and strengthening sustainable early childhood systems that contribute to quality early learning environments for children; improving access to and the quality of early childhood professional development for teachers, administrators and practitioners working with children; and bridging early childhood and K-3 education systems to increase the successful transition of young children.

Celebrating 10 Years of Impact in Early Grade Success

Through our work in Early Grade Success, Helios is empowering local communities to build systems to ensure more children and families have access to high-quality, early learning services that lead to language and literacy development. In addition, parents and early childhood educators are receiving the training they need to build learning environments that promote literacy skills and language acquisition. Over the past decade, Helios has invested more than \$17 million in Early Grade Success initiatives leading to quality early learning environments that have impacted more than 20,000 educators, parents and children.
